

API Integration

We've built an API bridge between our two platforms, creating an improved customer experience for all of TIBA's customers.

THIS INTEGRATION ENABLES OUR CSRS TO PUSH A RATE* THROUGH THE PARKER PLATFORM. IT ALSO ALLOWS US TO RAISE THE GATE THROUGH TIBA'S SOFTWARE, WHICH ENHANCES REPORTING.

TIBA has also connected their audio-only and two-way video intercoms** to our platform, dramatically decreasing the hardware cost of implementation.

*The functionality to push rates is currently available for X30 and X60 models.

**The video screen share is currently available for X60 models and requires additional TIBA hardware.

Please contact sales@parkertechnology.com to start the process.
