Parker Technology **+** **TIBA** PARKING SYSTEMS

API Integration Details

We've built an API bridge* between Parker Technology and TIBA Parking Systems, creating a more streamlined, efficient and customer-friendly parking experience.

Video & Audio Integration

TIBA has integrated their audio-only and two-way video** intercoms into our platform for affordable, seamless communication in parking facilities. This integration provides:

- **Lower Costs** – Reduces the need for extra hardware, making setup more affordable.

- **Faster Support** – Real-time video improves customer assistance and reduces delays.

- **Future-Ready Management** – Scalable for evolving parking technology needs.

Compatibility

*The TIBA control API is compatible with X30 and X60 models (version 5.2.3 and up).

**Video screen share is available for X60 models and requires additional TIBA hardware.
