NEW PLATFORM FEATURE:
MOBILE ENDPOINT BETA

WHAT IS MOBILE ENDPOINT?

Mobile Endpoint gives your customers access to help where there isn't an intercom. A simple QR code at your lot gives your customers the **power of Parker in the palm of their hand**.

Mobile Endpoint allows your customers to conveniently connect with a customer service rep on their cell phone, via a browser, with two-way video for an added personal touch.
PLUS, our customer service reps:

- **Know your lot and business rules**
- **Can facilitate payment**
- **Troubleshoot issues quickly & effectively**

Mobile Endpoint provides these benefits all while **protecting your revenue & enhancing the customer experience**.

Parker Technology

NEW PLATFORM FEATURE:
MOBILE ENDPOINT

A **QR code** can be posted wherever needed and a customer can scan it to initiate a help call.

You don't need electricity, gates, internet, intercoms, hardware or people.

Mobile Endpoint gives you the flexibility to help your customers, even if your lots aren't staffed 24/7.

*Get in touch or learn more at **helpmeparker.com/mobile-endpoint***
